Embedded Systems & Solutions

Tactical Communication Solutions

Delivering Technology and Solutions for Embedded Systems

Cornet Technology India, is an embedded systems design company. Over a short span of time, the company has developed the expertise in the design and development of rugged embedded computing and communication sub-systems for various industrial applications. Cornet delivers a range of devices, hardware and software for INTELLIGENCE, SURVEILLANCE and RECONNAISSANCE operations from concept-to-delivery. A combination of VOICE, VIDEO and DATA communication products from Cornet, constantly arm customers to plan, and protect people and property; from both internal and external threat.

Cornet devices are custom-integrated to meet and accelerate both strategic and tactical intelligence activities. On the strength of our long term partnerships with worldwide security establishments, we design and develop C2 Voice Communication Switches, Redundancy Switches, IP Video applications and High Performance Computing Boards.

Our products are robust and proven for several applications. Cornet's highly skilled team of engineers operating from a 30,000 sq ft state-of art development facility, transform complex requirements into simple, yet powerful integrated solutions which are backed by active 24x7 support.

PRODUCTS

Cornet Techvantage

- Freescale based Power PC boards – Single/Dual/Quad, 74xx, 864x, QorIQ boards
- DSP Boards based on Analag Devices/Texas Instruments
- Intel Processor-based SBCs
- Bus Technologies - VME/VXS/VPX/cPCI
- FPGA - VHDL/Verilog/Mixed Signal
- PMC 1553B/SDLC/ARINC/STM-1 cards
- Device Driver development
- Porting of Linux/VxWorks/Lynx
- Rugged Boards
- IP based Voice, Data & digital Video solutions
